AMENDMENT

In response to the Office Action of May 24, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please cancel claims 20-22, 40-44 and 47 without prejudice.

REMARKS

The undersigned appreciates the Examiner's taking the time to explain (1) that the rejections made under Ungar, Kuehnle and O'Dell are based on the contention that they each disclose substantially spherical particles according to the definitions given in the specification and (2) the examples/comparative examples submitted in this case are not considered to include a comparison of the closest prior art because they differ in more than one property.
